EDUCATION

Vellore Institute of Technology

Bachelor of Engineering in Computer Science, Cumulative GPA: 8.5/10

Expected May 2026

SKILLS

- **Technical:** Python, Java, SQL, Excel, Power BI, Tableau, ML, Gen AI, NLP, Scikit-learn, NLP, AWS, Matplotlib, Predictive Modelling, Frontend development, HTML, CSS, JavaScript, Git, GitHub.
- **Non-Technical:** Excel, Prompt Engineering, Data Visualization, Networking Skills, Collaboration & Teamwork

EXPERIENCE

Technical Consultant (SME) – Intern, Intervue.io | Bangalore (Hybrid)

Jan 2026 – Present.

- Analyzed daily interview data and performance metrics across 15+ roles, identifying hiring trends and process gaps, leading to a 20% improvement in interview efficiency and reduced re-interviews.
- Serving as a client-facing technical consultant for 10+ enterprise clients, aligning technical requirements with business goals, managing stakeholder communication, and resolving 100% of technical escalations within SLA.

PROJECTS

INSIGHTEdge – Customer Purchase Intelligence Platform

January 2026 – March 2026

Tools: Python, SQL, Power BI, Jupyter Notebook, Excel

- Analyzed 3,900+ customer records using Python to identify purchasing patterns, customer behavior, and key business drivers.
- Performed EDA and built a normalized SQL database to evaluate repeat purchases, revenue contribution, and customer segments.
- Developed an interactive Power BI dashboard with 10+ KPIs, DAX measures, drill-throughs, and dynamic filters for insights.

AGRIM – Advanced Healthcare Chatbot

November 2025 – December 2025

Tools: Python, LLM, RAG, TensorFlow, Flask, Real-Time APIs, Google Colab

- Developed a chatbot that analyses real-time sensor data to assist with preliminary health diagnosis, reducing diagnosis time by 40% and increasing diagnostic accuracy by 25% across 100+ test cases.
- Designed an API-based data pipeline in Flask for live data ingestion, response under one second and dashboard.
- Trained NLP models with RAG based pipelines using clinical datasets, achieving 93% accuracy in test environments

AlchainX – Decentralized AI Model Marketplace

August 2025 – September 2025

Tools: HTML, CSS, JavaScript, Solidity, BlockDAG Testnet, ERC-1155, Chainlink, IPFS/Filecoin

- Built a responsive full-stack platform for discovering, licensing, and deploying AI models using blockchain technology.
- Tokenized 100+ AI/ML models as ERC-1155 assets with smart contract-based licensing, royalties, and usage controls.
- Integrated Chainlink and IPFS/Filecoin for decentralized storage, secure AI inference, and dynamic model pricing.

CERTIFICATIONS

- AWS Certified Cloud Practitioner -AWS
- IBM GEN AI Certificate -IBM

October 2025

April 2025

ACHIEVEMENTS & ACTIVITIES

- Shortlisted for Adobe Hackathon 2025 Round 2 among 2,62,152 teams, with only 4000 teams advancing.
- Advanced to the final round in the Block DAG Hackathon 2025, demonstrating strong problem-solving and ideation skills.
- Secured advancement to Round 2 among 2000+ participants in Google Girl Hackathon 2023, ranking within the top 2.5% of female coders nationwide.
- Top 3 Finalist among 300+ participants, Fintech Club (VITB) – Pitched a business idea to Rakhi Pal (Shark Tank Finalist).
- Achieved 201st position among 3000+ participants in the Implementation Round of Myntra HackerRamp 2024, post successful completion of the Ideation Phase.

EXTRACURRICULAR

PR Lead, Android Club

June 2023 – Present

- Led Dev- PR and outreach campaigns; conducted 3+ Technical workshops with 300+ participants on Android fundamentals.

Social Media Lead, English Literary Association Club

December 2023 – Present

- Managed the launch of the ELA Gazette 2024, increased reach by 30% via marketing and brand storytelling.
